

About the Cover

This rendering of the proposed new Senior Center and Historical Museum was prepared by Hill Engineers, Architects & Planners. It is designed to compliment the new Library proposed for the same site. The single story Senior Center is planned to be approximately 10,000 square feet and will include staff offices, kitchen, coffee shop, fitness room, a dining/multipurpose room, small meeting room, learning center, game room and arts & crafts area. The Historical Museum, office space and work area (4,000 square feet) will be the anchor connecting the Senior Center and Library, offering residents of all ages access to the history and artifacts of our town.

The cover of this year's annual Report is provided to the Town of Dalton by Crane & Co., Inc.
